

DAY 1 – KEYWORD RESEARCH: RESEARCH & PLANNING

Internship Task Report

Task ID	DM-SEO-002
Task Name	Keyword Research for FreeInternships.in
Domain	Website SEO & Technical SEO
Internship	Free Online Digital Marketing Internship
Company	Data Alcott Systems
Website	www.freeinternships.in
Student Name	PRADYUMNA K N
Student Code	DAS007834
Day	1 – Research & Planning
Date	31 August 2026

1. Introduction

Keyword research is an important part of Search Engine Optimization (SEO). It helps identify the words and phrases users type into search engines when looking for information, services, internships, courses, and career opportunities.

For this project, keyword research is being conducted for FreeInternships.in, a website focused on free online internships and career-related opportunities for students and job seekers. The purpose of Day 1 is to understand the website niche, identify the target audience, study competitors, and prepare a list of seed keywords that will be expanded and analyzed during the following days.

2. Objective of Day 1

- Understand the niche of FreeInternships.in.
- Identify the target audience.
- Understand the website's main services and topics.
- Identify important seed keywords.
- Brainstorm relevant keyword ideas.
- Identify major competitors in the internship space.
- Study competitor keyword opportunities.
- Prepare a keyword research methodology.
- Create a foundation for detailed keyword research.

3. Website Niche Analysis

Main Niche: Online internships, free internships, student internships and career development.

Related Topics: Free online internships; Digital marketing internships; SEO internships; Web development internships; Java internships; Python internships; AI and Data Science internships; UI/UX design internships; Online internships for students; Internship certificates; Work-from-home internships; Skill development; Career opportunities.

The website primarily targets students and learners who are interested in gaining practical experience and improving their career skills through online internships.

4. Target Audience

Primary: College students, degree students, fresh graduates, students looking for internships, online internships, work-from-home opportunities, and beginners interested in digital skills.

Secondary: Job seekers, career beginners, students looking for internship certificates, learners interested in technology and digital marketing, and students searching for practical project experience.

Target Location: India, while also considering broader searches related to online and virtual internships.

5. Search Behavior Analysis

Potential users may search using general terms such as internships for students, online internships, free internships and internship programs; skill-based terms such as digital marketing internship, SEO internship, Python internship, Java internship, web development internship, UI UX internship and AI internship; benefit-based terms such as internship with certificate, work from home internship and job assistance; and action-based terms such as apply, register and join internship.

6. Seed Keyword Identification

No.	Seed Keyword	Main Topic
1	free internships	General internships
2	online internships	Online learning
3	internships for students	Student internships
4	digital marketing internship	Digital marketing
5	SEO internship	SEO
6	web development internship	Web development
7	Python internship	Programming
8	Java internship	Programming
9	AI internship	Artificial intelligence
10	UI UX internship	Design

These keywords will be used as the base for keyword expansion on Day 2.

7. Keyword Brainstorming

Internship: free online internship; online internship for students; free internship programs; internship opportunities for students; virtual internship; remote internship; online internship programs; internship for freshers.

Digital Marketing: digital marketing internship; free digital marketing internship; online digital marketing internship; digital marketing internship for students; digital marketing internship with certificate.

SEO: SEO internship; free SEO internship; SEO internship online; SEO internship for students; SEO internship with certificate; online SEO internship.

Technology: Python internship; Java internship; web development internship; full stack development internship; AI internship; data science internship; mobile app development internship.

Certificate/Benefits: free internship with certificate; online internship with certificate; internship certificate for students; internship with job assistance; internship with real-time projects.

8. Competitor Research Planning

Competitor research will examine internship platforms, student career websites, online learning platforms, technology internship providers, and government or educational internship portals. Potential competitors include Internshala, Indeed, LinkedIn, Naukri, LetsIntern and AICTE internship-related resources. The purpose is to identify keyword opportunities, content gaps and search intent, not to copy competitor content.

9. Competitor Analysis Plan

Ranking keywords, search volume, keyword difficulty, top pages, content topics, long-tail keywords, search intent and keyword gaps will be collected. Detailed competitor analysis is planned for Day 4.

10. Search Intent Planning

Informational: what is a digital marketing internship; how to get an online internship.

Navigational: FreeInternships.in; FreeInternships online internship.

Commercial: best online internship for students; best digital marketing internship; online internship with certificate.

Transactional: apply for free internship; register for online internship; join digital marketing internship. Individual keyword intent will be validated during Day 3.

11. Keyword Research Methodology

1. Identify seed keywords. 2. Expand into long-tail, related, question and variation keywords. 3. Collect search volume, keyword difficulty, competition, CPC where available, traffic potential and search intent. 4. Research competitor rankings and content gaps. 5. Organize keywords into main, supporting, long-tail, question and topic-cluster groups. 6. Prioritize using search demand, relevance, competition, business value and ranking opportunity.

12. Tools Planned for the Project

Ahrefs: keyword ideas, difficulty, search volume, competitor research and gap analysis.

SEMrush: keyword research, competitor analysis, difficulty and organic opportunities.

Google Keyword Planner: keyword ideas, volume ranges and competition.

Ubersuggest: keyword suggestions, long-tail and related terms.

Google Search: search intent, SERP analysis, related searches and competitor discovery.

13. Initial Keyword Categories

Cluster 1 – Free Internships

free online internships; free internship programs; free internships for students; free internship with certificate

Cluster 2 – Online Internships

online internships for students; virtual internships; remote internships; online internship programs

Cluster 3 – Digital Marketing

free digital marketing internship; online digital marketing internship; digital marketing internship for students; digital marketing internship with certificate

Cluster 4 – SEO

free SEO internship; online SEO internship; SEO internship for students; SEO internship with certificate

Cluster 5 – Technology Internships

Python internship; Java internship; web development internship; full stack internship; AI internship; data science internship

Cluster 6 – Design Internships

UI UX internship; UI design internship; UX design internship; online UI UX internship

14. Initial Keyword Priority

Priority	Keyword	Reason
High	free online internships	Strong relevance
High	online internships for students	Target audience match
High	digital marketing internship	Important service/topic
High	free digital marketing internship	Strong website relevance
High	SEO internship	Relevant SEO category
Medium	web development internship	Technology opportunity
Medium	Python internship	Student-focused opportunity
Medium	Java internship	Student-focused opportunity
Medium	AI internship	Growing technology topic
Medium	UI UX internship	Design-related opportunity

Actual search volume and keyword difficulty will be verified using the selected tools during Days 2–3 rather than assuming the example figures in the task brief.

15. Initial Keyword Gap Opportunities

Potential opportunities include combinations of Free + internship, Online + internship, Internship + students, Internship + certificate, Internship + skill, Internship + work from home, Internship + real-time project, and Internship + job assistance. Examples: free online internship with certificate; online internship for college students; free digital marketing internship with certificate; SEO internship for students online; free web development internship; online Python internship for students; free Java internship online.

16. Expected Outcomes

A comprehensive keyword database; high-value keyword identification; long-tail and question keyword lists; search intent classification; competitor keyword analysis; keyword gap opportunities; topic clusters; content pillars; keyword prioritization; SEO content recommendations; content calendar; and final keyword research report.

17. Day 1 Work Completed

Website niche identified; target audience identified; search behavior reviewed; seed keywords identified; keyword categories created; initial keyword ideas brainstormed; competitor research plan prepared; search intent framework prepared; methodology created; tools identified; initial priorities established; potential keyword gaps identified.

18. Day 1 Conclusion

Day 1 established the foundation for the DM-SEO-002 Keyword Research Project for FreeInternships.in. The next stage will expand the seed keywords into long-tail, related and question-based keywords using keyword research tools.

Day 2 Focus – Keyword Expansion

Expand seed keywords; find long-tail keywords; find question keywords; find related keywords; collect keyword suggestions; prepare the initial keyword spreadsheet.

Project Status

Task ID: DM-SEO-002 | Day: 1 of 7 | Status: Completed – Research & Planning | Student: PRADYUMNA K N | Student Code: DAS007834

DAY 2 – KEYWORD EXPANSION

Internship Task Report

Task ID	DM-SEO-002
Task Name	Keyword Research for FreeInternships.in
Domain	Website SEO & Technical SEO
Internship	Free Online Digital Marketing Internship
Company	Data Alcott Systems
Website	www.freeinternships.in
Student Name	PRADYUMNA K N
Student Code	DAS007834
Day	2 – Keyword Expansion
Date	1 September 2026

1. Introduction

Day 2 focuses on expanding the seed keywords identified during Day 1 into a wider keyword set. The expansion includes long-tail, question-based, related, benefit-focused, skill-specific and action-oriented keywords. These keywords form the working database for search-volume, difficulty and intent validation on Day 3.

2. Objective of Day 2

- Expand the 10 seed keywords from Day 1.
- Generate long-tail keyword variations.
- Identify question-based keywords.
- Identify related and supporting terms.
- Organize keywords into topic groups.
- Identify certificate, project, job-assistance and online-learning opportunities.
- Prepare a larger database for metric validation.

3. Seed Keywords Used

free internships; online internships; internships for students; digital marketing internship; SEO internship; web development internship; Python internship; Java internship; AI internship; UI UX internship.

4. Keyword Expansion Method

Modifiers used for expansion included: free, online, students, college students, freshers, India, certificate, job assistance, real-time projects, work from home, remote, beginner, registration, apply, training and program. These combinations were organized by topic and intent.

5. Expanded Keyword Groups

Seed/Topic	Expanded Keyword Examples
Free internships	free online internship; free internship for students; free internship with certificate; free internship programs; free internship in India
Online internships	online internship for students; virtual internship; remote internship; work from home internship; online internship with certificate
Student internships	internship for college students; internship for degree students; internship for freshers; online internship for students; student intern
Digital marketing	free digital marketing internship; online digital marketing internship; digital marketing internship for students; digital marketing inter
SEO	free SEO internship; SEO internship online; SEO internship for students; SEO internship with certificate; beginner SEO internship
Web development	free web development internship; online web development internship; web development internship for students; full stack internsh
Python	online Python internship; Python internship for students; free Python internship; Python internship with certificate; Python internsh
Java	online Java internship; Java internship for students; free Java internship; Java internship with certificate; Java full stack internship
AI	free AI internship; online AI internship; AI internship for students; AI and data science internship; AI internship with certificate

Seed/Topic	Expanded Keyword Examples
UI UX	online UI UX internship; UI UX internship for students; free UI UX internship; UI UX design internship with certificate; beginner UI UX

6. Long-Tail Keyword Research

Priority long-tail opportunities identified for validation include: free online internship with certificate; online internship for college students; free digital marketing internship with certificate; SEO internship for students online; free web development internship; online Python internship for students; free Java internship online; AI and data science internship online; and online UI UX internship for students.

7. Question-Based Keywords

No.	Question Keyword
1	how to get a free online internship
2	how to apply for an online internship
3	what is an online internship
4	are free internships available for students
5	how to get a digital marketing internship
6	what does a digital marketing intern do
7	how to get an SEO internship
8	what skills are needed for an SEO internship
9	how to get a web development internship
10	how to get a Python internship as a student
11	how to get a Java internship for freshers
12	what is an AI internship
13	how to start a UI UX internship
14	do online internships provide certificates
15	how to apply for a free internship with certificate

8. Related / Supporting Keywords

internship opportunities; internship program; online training; practical experience; real-time project; internship certificate; career skills; job assistance; work from home; virtual internship; remote learning; college students; degree students; freshers; beginners; skill development; career development; digital skills; SEO training; digital marketing skills; web development skills; programming internship; data science; artificial intelligence; UI design; UX design.

9. Benefit-Based Keyword Expansion

Benefit-focused variations were identified around certificate, real-time projects, job assistance, free access, online learning, flexible learning and work-from-home. Examples include free internship with certificate; internship with real-time projects; internship with job assistance; online internship with certificate; and work from home internship for students.

10. Action / Transactional Keyword Expansion

Action phrases include: apply for free internship; register for online internship; join digital marketing internship; apply for SEO internship; enroll in online internship; join free internship program; register for internship with certificate; and apply for work from home internship.

11. Topic Clusters Created

Cluster 1 – Free Internships; Cluster 2 – Online/Student Internships; Cluster 3 – Digital Marketing; Cluster 4 – SEO; Cluster 5 – Technology (Python, Java, web development, full stack, AI, data science); Cluster 6 – Design (UI UX, UI design, UX design).

12. Keyword Mapping Plan

Core keywords can support main internship landing pages, skill keywords can support dedicated internship pages, long-tail keywords can support blogs and FAQs, and transactional keywords can support application or registration pages.

13. Important Validation Note

The Day 2 list is a keyword expansion database. Search volume, keyword difficulty, competition, CPC and final search intent must be validated with actual Ahrefs, SEMrush, Google Keyword Planner or Ubersuggest data before being presented as measured metrics. No search-volume numbers are invented in this report.

14. Day 2 Work Completed

- ✓ Seed keywords expanded
- ✓ Long-tail keywords identified
- ✓ Question-based keywords identified
- ✓ Related/supporting terms identified
- ✓ Benefit-based keywords identified
- ✓ Action-oriented keywords identified
- ✓ Topic clusters organized
- ✓ Keyword mapping approach prepared
- ✓ Spreadsheet database prepared for Day 3 validation

15. Day 2 Conclusion

Day 2 expanded the initial seed list into a structured keyword database covering general internships, student internships, digital marketing, SEO, technology, AI and UI/UX. The expanded keywords include specific long-tail and question-based searches that can be used to understand user needs and create targeted content.

Day 3 Focus – Keyword Analysis

Check search volume, keyword difficulty, competition, CPC where available, click-through potential and search intent. The strongest keywords will then be prioritized for the final SEO strategy.

Project Status

Task ID: DM-SEO-002 | Day: 2 of 7 | Status: Completed – Keyword Expansion | Student: PRADYUMNA K N | Student Code: DAS007834

DAY 3 – KEYWORD ANALYSIS REPORT

DM-SEO-002 | FreeInternships.in | Student Code: DAS007834

Research date: 1 September 2026

Executive Summary

The Day 3 workbook analyzes 153 keywords carried forward from the Day 2 expansion set. It adds search-intent, business relevance, CTR potential, provisional prioritization and fields for Search Volume, KD and CPC validation. The metric fields remain blank until verified with Ahrefs, SEMrush, Google Keyword Planner or Ubersuggest.

Keyword Portfolio

Metric	Count
Total keywords	153
Informational	31
Commercial	83
Transactional	39
Navigational	0

Prioritization

Priority	Count
Provisional High	85
Provisional Medium	35
Provisional Low	33

Day 3 Methodology

- Validate monthly search volume using a consistent country/database.
- Record KD and CPC from the chosen SEO tool and retain the source.
- Review SERP features and expected organic CTR.
- Classify intent and evaluate business relevance.
- Recalculate priority after real tool metrics are entered.
- Use validated quick-win keywords as inputs for Day 4 competitor gap analysis.

Strategic Recommendations

- Prioritize specific free + online + internship combinations for achievable early wins.
- Build dedicated landing pages around certificate, student and fresher intent.
- Create a digital marketing cluster covering SEO, social media, content marketing and Google Ads.
- Use question keywords for supporting blog content and internal links.
- Capture screenshots of Ahrefs/SEMrush/GKP/Ubersuggest metrics for submission evidence.
- Keep metric source, country/database and research date recorded for auditability.

Data Integrity Note

The Day 2 source states that Search Volume, Keyword Difficulty and CPC were intentionally left blank and should be collected from Ahrefs, SEMrush, Google Keyword Planner and/or Ubersuggest rather than estimated. This Day 3 package follows that requirement.

Submission Checklist

- Day 3 analyzed Excel workbook
- Day 3 PDF report
- SEO-tool screenshots for validated metrics
- Final validated keyword shortlist for Day 4

DAY 4 – COMPETITOR KEYWORD ANALYSIS REPORT

DM-SEO-002 | FreeInternships.in | Student Code: DAS007834

Research date: 1 September 2026

Executive Summary

This Day 4 package evaluates 153 Day 3 keywords against six documented competitor themes. 153 keywords show direct theme overlap. These are opportunity signals, not verified ranking gaps, because no live Ahrefs/SEMrush competitor export was supplied.

Competitor Set

Competitor	Primary focus
Internshala	internship, digital marketing internship, work from home internship, internship for fre
AICTE Internship Portal	internship, verified internship, virtual internship, digital marketing internship
InternCircle	free internship, free internships in india, work from home internship, internship certi
Growfinix	free online internship, free internship with certificate, remote internship, digital mark
Urban Fingers	free digital marketing internship, digital marketing internship, digital marketing traini
Workora	free virtual internship, virtual internship, internship certificate, online internship

Opportunity Summary

Opportunity	Keywords
High	85
Medium	35
Low	33

Key Findings

- Free internship, certificate, remote/work-from-home and digital-marketing themes recur across competitors.
- Student and fresher modifiers provide useful landing-page and informational opportunities.
- SEO, web development, Python/Java full-stack, AI/Data Science and UI/UX themes should be checked for competitor coverage.
- Run Ahrefs/SEMrush Keyword Gap first on high-priority Day 3 keywords.
- Only report exact competitor positions, traffic and gaps after live tool validation.

Recommended Day 4 Workflow

- Export competitor organic keywords from Ahrefs or SEMrush.
- Run Keyword Gap with FreeInternships.in as the target.
- Filter for keywords where multiple competitors rank but the target site does not.
- Combine the gap list with validated Volume/KD/intent data.
- Group opportunities into free internships, certificate, digital marketing, SEO, student/fresher, remote and technology clusters.
- Carry the validated shortlist into Day 5 keyword clustering and content mapping.

Data Integrity Note

This package does not invent competitor ranking positions, traffic or measured gap counts. It clearly distinguishes documented theme overlap from a verified SEO gap.

Submission Checklist

- Day 4 competitor Excel workbook
- Day 4 PDF report
- Ahrefs/SEMrush Keyword Gap export or screenshots
- Validated competitor ranking evidence
- Final Day 4 keyword-gap shortlist

DAY 5 – KEYWORD ORGANIZATION & CONTENT STRATEGY

DM-SEO-002 | FreeInternships.in | Student Code: DAS007834

Research date: 1 September 2026

Executive Summary

The Day 5 package organizes 153 keywords into 8 content pillars and maps them to recommended landing pages, supporting guides, internal links and a practical content calendar.

Content Pillars

Pillar	Keywords
Web & Full-Stack Internships	41
Digital Marketing Internships	40
Free Online Internships	19
Student & Fresher Internships	15
AI & Data Science Internships	15
UI/UX Internships	14
Remote / Work-from-Home Internships	5
Internship Certificates	4

Architecture & Recommendations

- Pillar page → cluster landing page → supporting blog/FAQ content.
- Map one primary keyword to each URL and use semantically close variants as secondary terms.
- Link informational articles to relevant landing pages with useful anchor text.
- Consolidate near-duplicate variants unless SERP intent differs materially.
- Use original project, certificate and student-outcome evidence to strengthen content.
- Validate Volume/KD/CPC before locking final priorities.

Content Calendar

Day	Pillar	Keyword Theme	Content Type
Day 1	Free Online Internships	free online internship	Pillar page
Day 2	Digital Marketing Internships	digital marketing internship	Landing page
Day 3	SEO Internships	SEO internship	Landing page
Day 4	Remote / Work-from-Home Internships	work from home internship	Blog + landing page
Day 5	Internship Certificates	internship certificate	Guide
Day 6	Student & Fresher Internships	internship for freshers	Blog
Day 1	Web & Full-Stack Internships	web development internship	Landing page
Day 2	AI & Data Science Internships	AI data science internship	Landing page
Day 3	UI/UX Internships	UI UX internship	Landing page

Submission Checklist

- Day 5 keyword-cluster Excel workbook
- Day 5 PDF report
- Final keyword-to-URL mapping
- Content calendar
- Internal-linking plan
- Validated SEO-tool metrics

DAY 6 – FINAL SEO REPORT & STRATEGY

DM-SEO-002 | FreeInternships.in | Student Code: DAS007834

Report date: 1 September 2026

1. Executive Summary

This final Day 6 report consolidates the keyword research workflow into an actionable SEO strategy. 153 keywords are organized across 8 content pillars, with priority signals, URL mapping, content planning, technical SEO actions and KPIs. The workbook is designed for submission and implementation planning.

2. Key Research Findings

- 85 keywords are currently classified as high-opportunity planning targets.
- 35 keywords are classified as medium opportunity and should be validated against live SERPs.
- Primary SEO growth areas include free internships, digital marketing, SEO, web/full-stack, remote, student/fresher, certificate, AI/data science and UI/UX themes.
- Competitor gaps should be reported only after live Ahrefs/SEMrush Keyword Gap validation.
- Keyword Volume, KD and CPC values must be populated from validated tool exports where absent.

3. Content Pillar Strategy

Content Pillar	Keywords	Priority
Web & Full-Stack Internships	41	High
Digital Marketing Internships	40	High
Free Online Internships	19	High
Student & Fresher Internships	15	High
AI & Data Science Internships	15	Medium
UI/UX Internships	14	Medium
Remote / Work-from-Home Internships	5	High
Internship Certificates	4	High

4. On-Page & Technical SEO Action Plan

Title tags & H1s — High: Assign one clear primary keyword and unique intent-matched title/H1 per indexable page. Benefit: Better relevance and CTR.

Meta descriptions — Medium: Write unique benefit-led descriptions with clear CTA. Benefit: Higher SERP CTR.

Internal links — High: Link supporting articles to pillar and conversion pages. Benefit: Stronger topical structure.

Canonicalization — High: Check duplicate/parameter URLs and canonical targets. Benefit: Avoid duplicate-indexing signals.

Indexation — High: Review sitemap, robots directives and important page indexing. Benefit: Improved crawl/index coverage.

Core Web Vitals — Medium: Audit mobile speed, layout stability and responsiveness. Benefit: Better UX and technical quality.

Structured data — Medium: Apply relevant valid schema where appropriate. Benefit: Enhanced search understanding.

Content quality — High: Add original internship projects, evidence, FAQs and student outcomes. Benefit: Trust and topical depth.

Image SEO — Medium: Compress images, descriptive filenames, alt text. Benefit: UX/accessibility/image discovery.

Measurement — High: Track clicks, impressions, CTR, position and organic applications. Benefit: Closed-loop optimization.

5. Internal Linking Strategy

- Create a clear pillar → cluster → supporting-content hierarchy.
- Link informational articles to the most relevant internship landing page.
- Cross-link related technology and audience clusters where search intent overlaps.
- Use descriptive, natural anchor text rather than repetitive exact-match anchors.
- Review orphan pages and add contextual internal links during every content publication cycle.

6. KPI Measurement Framework

KPI	Frequency	Primary source
Organic impressions	Weekly	Google Search Console
Organic clicks	Weekly	Google Search Console
CTR	Weekly	Google Search Console
Average position	Weekly	Google Search Console
Indexed pages	Monthly	Search Console / crawler
Organic applications	Monthly	Analytics / site data
Referring domains	Monthly	Ahrefs / SEMrush

7. 30-Day SEO Roadmap

- Days 1–7: technical crawl, sitemap, robots, canonical and indexation review.
- Days 8–14: publish/optimize priority pillar and landing pages.
- Days 15–21: publish supporting long-tail/question content and strengthen internal links.
- Days 22–30: analyze Search Console/analytics results and iterate titles, content and links.

8. Data Integrity & Submission Notes

This report deliberately does not fabricate search volume, keyword difficulty, CPC, competitor rankings or traffic. Exact competitor-gap claims should be supported by live Ahrefs/SEMrush exports or screenshots. Recommended URLs should be checked against the site's actual architecture before implementation.

9. Final Submission Checklist

- Day 6 Excel workbook
- Day 6 PDF report
- Live Ahrefs/SEMrush competitor-gap evidence
- Validated Volume/KD/CPC metrics
- Keyword-to-URL mapping reviewed
- Technical SEO recommendations reviewed
- KPI tracking plan ready
