

DAY 7 – FINAL SUBMISSION REPORT

DM-SEO-002 – Keyword Research for FreeInternships.in

Student: PRADYUMNA K N **Student Code:** DAS007834 **Domain:** Digital Marketing

Company: Data Alcott Systems **Website:** FreeInternships.in **Date:** 03 September 2026

1. Submission Objective

The objective of Day 7 is to finalize, organize and submit the keyword research project completed during Days 1–6. The final submission consolidates keyword research, analysis, competitor-theme review, keyword clustering, content strategy, SEO actions, KPI planning and the 30-day roadmap.

2. Work Completed

Day	Completed Work
Day 1	Research & planning, audience analysis, niche definition, seed keywords, competitor set and methodology.
Day 2	Keyword expansion and development of broader keyword opportunities from the initial research.
Day 3	Keyword analysis covering intent, topic clusters, priority, content recommendations and metric-validation fields.
Day 4	Competitor keyword/theme analysis using a defined competitor set; exact ranking gaps remain subject to live Ahrefs/SEMrush.
Day 5	Keyword organization into 8 content pillars with landing-page, supporting-content and internal-linking recommendations.
Day 6	Final SEO strategy, priority framework, content strategy, SEO action plan, KPI tracker, 30-day roadmap and data-integrity con
Day 7	Final review, submission package preparation and documentation.

3. Final Research Summary

The final keyword research contains **153 keywords** organized across **8 content pillars**. The priority framework identifies **85 high-opportunity**, **35 medium** and **33 low** priority keywords. The strongest strategic areas include free online internships, digital marketing, SEO, web/full-stack, student/fresher, remote/work-from-home, internship certificates, AI/data science and UI/UX.

Content Pillar	Keywords
Web & Full-Stack Internships	41
Digital Marketing Internships	40
Free Online Internships	19
Student & Fresher Internships	15
AI & Data Science Internships	15
UI/UX Internships	14
Remote / Work-from-Home Internships	5
Internship Certificates	4

4. Key SEO Recommendations

- Use one primary keyword per URL and relevant semantic variants as secondary terms.
- Build a pillar → cluster landing page → supporting article/FAQ structure.

- Strengthen title tags, H1s, meta descriptions, internal links and canonicalization.
- Review indexation and orphan pages and connect informational content to relevant landing pages.
- Improve content quality with original project evidence, internship outcomes and useful student-focused information.
- Validate search volume, keyword difficulty and CPC with live Ahrefs, SEMrush, Google Keyword Planner or Ubersuggest data before final business prioritization.

5. Data Integrity Note

The supplied workbooks intentionally leave some Volume, KD and CPC fields for live-tool validation. Competitor ranking gaps, traffic figures and exact competitor positions were not presented as verified facts without live exports. This preserves the accuracy and credibility of the internship submission.

6. Final Deliverables

- DM-SEO-002_Combined_Final_Report_DAS007834.pdf
- DM-SEO-002_Day1-Day6_Master_Excel_Report_DAS007834.xlsx
- DM-SEO-002_Day-7_Final_Submission_Report_DAS007834.pdf
- GitHub README.md / project documentation
- YouTube project demonstration video (if required by the internship portal)

7. Task Outcome

Completed a structured keyword research project for FreeInternships.in covering research planning, keyword expansion, analysis, competitor-theme review, clustering, content strategy and final SEO planning. The final dataset and strategy provide a practical foundation for improving organic visibility and attracting students searching for internships.
