DM-SEO-002 — Keyword Research for FreeInternships.in

Student Code: DAS007834

Website: www.freeinternships.in

Organization: Data Alcott Systems

Project: Free Online Digital Marketing Internship

Project Overview

This project documents a complete keyword research and SEO planning workflow for FreeInternships.in. The objective was to identify relevant search opportunities, organize them by intent and topic, evaluate competitive themes, and convert the findings into a practical content and technical SEO strategy.

Objectives

- Identify seed keywords related to free online internships and student career opportunities.
- Expand seed terms into a structured keyword portfolio.
- Classify keywords by search intent and planning priority.
- Build topic clusters and content pillars for scalable SEO.
- Develop competitor-gap and content opportunity frameworks.
- Translate keyword research into on-page, technical SEO, internal-linking and content recommendations.
- Create a 30-day implementation roadmap and measurement framework.

Research Workflow

- **Day 1:** Research & Planning — defined audience, seed themes and keyword framework.
- **Day 2:** Keyword Expansion — expanded seed terms into a broad working list.
- **Day 3:** Keyword Analysis — organized 153 final planning keywords by intent and priority.
- **Day 4:** Competitor Analysis — established competitor benchmark and gap framework.
- **Day 5:** Keyword Organization — grouped keywords into 8 core content pillars.
- **Day 6:** Final Strategy — converted research into SEO recommendations and a 30-day roadmap.
- **Day 7:** Submission — prepared final report, spreadsheet, presentation and submission materials.

Final Project Snapshot

Metric	Final planning output
Keywords analyzed	153
Content pillars	8
High priority	85
Medium priority	35
Low priority	33
Roadmap	30 days

Core Content Pillars

- Web Development / Full Stack
- Digital Marketing
- Free Online Internships
- Students & Freshers
- AI & Data Science
- UI/UX Design
- Remote Internships
- Internship Certificates

SEO Strategy

- **On-page:** unique title tags, H1s, benefit-led meta descriptions and focused landing pages.
- **Technical:** crawlability, indexation, XML sitemap, robots.txt, canonicalization and Core Web Vitals.
- **Content:** original internship/project content, FAQs, student resources and certificate information.
- **Internal linking:** connect supporting articles to pillar pages and relevant internship/application pages.
- **Measurement:** monitor impressions, clicks, CTR, average position, indexed pages and organic applications.

Competitor Benchmark

- Benchmark themes included Internshala, AICTE Internship Portal, InternCircle, Growfinix, Urban Fingers and Workora.
- Competitor analysis was used to identify content themes and opportunity areas, not to claim unverified live rankings.
- Exact search volume, KD, CPC and ranking-gap figures should be validated with live Ahrefs, SEMrush, Google Keyword Planner or Ubersuggest evidence.

30-Day Roadmap

- **Days 1–7:** technical audit, crawlability, indexation, sitemap, robots.txt and canonical checks.
- **Days 8–14:** optimize highest-relevance pillar and internship landing pages.
- **Days 15–21:** publish long-tail/question content and strengthen internal links.
- **Days 22–30:** review Search Console/analytics performance and iterate.

Data Integrity Note

The figures in this report are project-planning outputs. Keyword metrics such as search volume, keyword difficulty, CPC and live rankings should not be treated as verified tool measurements unless supported by a dated SEO-tool export or screenshot.
