DM-SEO-002 — Keyword Research for FreeInternships.in

Student Code: DAS007834

Company: Data Alcott Systems

Website: www.freeinternships.in

Internship: Free Online Digital Marketing Internship

Submission Title

Keyword Research & SEO Strategy for FreeInternships.in

Portal Submission Description

Completed the DM-SEO-002 Keyword Research task for FreeInternships.in as part of the Free Online Digital Marketing Internship. The project covered the complete keyword research workflow from seed-keyword identification and expansion through keyword analysis, competitor benchmarking, clustering, content planning and final SEO strategy.

The final research portfolio contains **153 organized keywords** across **8 core content pillars**. The planning framework categorizes keywords into **85 High, 35 Medium and 33 Low priority** targets and maps them to landing pages, pillar content, blog articles and supporting resources.

Key Work Completed

- Seed keyword research for free internships, digital marketing, SEO, web/full-stack, AI & Data Science, UI/UX, remote internships and student opportunities.
- Keyword expansion and final portfolio organization.
- Search-intent classification and priority mapping.
- Competitor benchmarking and keyword-gap methodology.
- Keyword clustering into 8 content pillars.
- On-page SEO, technical SEO, content, internal-linking and measurement recommendations.
- 30-day SEO implementation roadmap.

Final Deliverables

- Day 1–Day 6 Combined Final Report PDF
- Day 1–Day 6 Master Excel Keyword Research Workbook
- Day 7 Final Submission Report
- GitHub README / project documentation
- Final Presentation PPT
- 153 researched and organized keywords
- 8 SEO content pillars
- 30-day SEO roadmap

Learning Outcomes

- Seed-to-keyword-expansion process.

- Search-intent classification and keyword prioritization.
- Competitor-gap thinking and topic clustering.
- Keyword-to-content mapping.
- Technical SEO, internal linking and performance measurement.
- Practical SEO roadmap development.

Suggested Short Portal Version

DM-SEO-002 completed successfully. Conducted keyword research and SEO planning for FreeInternships.in, including seed keyword research, keyword expansion, intent classification, priority mapping, competitor analysis, content clustering and technical SEO recommendations. Final output: 153 organized keywords, 8 content pillars, 85 high-priority planning targets and a 30-day SEO roadmap, supported by the final report, master Excel workbook, GitHub README and presentation.

Validation Note

Keyword counts and priority distribution represent the project's planning framework. Live search volume, keyword difficulty, CPC and current rankings should be validated from Ahrefs, SEMrush, Google Keyword Planner or Ubersuggest before being presented as measured market data.

Submission Status

Ready for portal submission. Attach the final PDF/report, master Excel, GitHub repository/README and presentation as required by the internship portal.
